

High Demand Skills

PREPARED BY: ABDULLAH ALSUBAIE

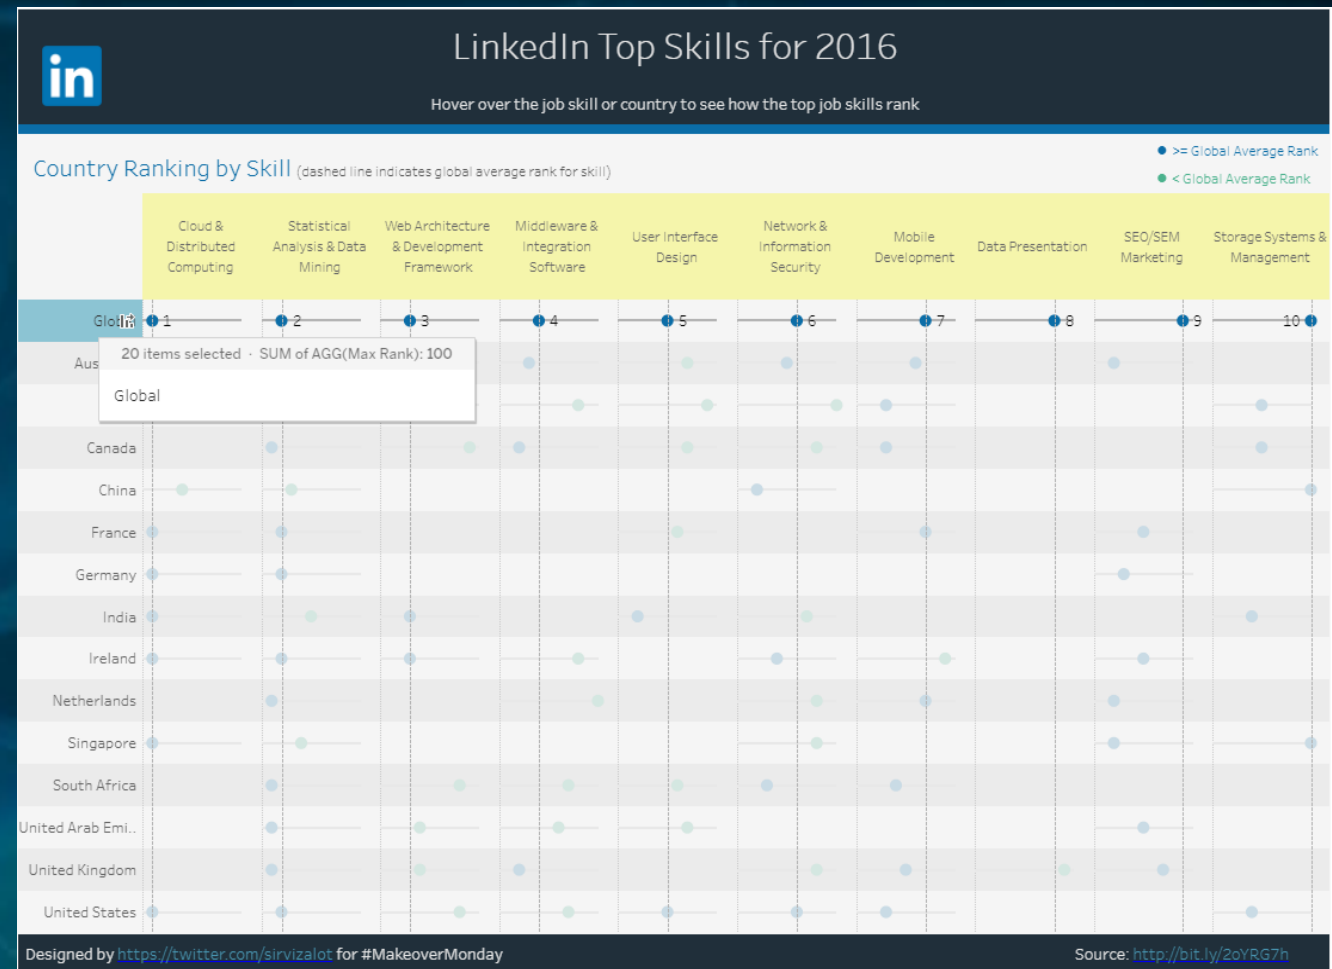

What are the Top Skills Globally ?

I clicked on Global row to highlight the Top 3 skills in 2016 and they are:

- Cloud & Distributed Computing.
- Statistics Analysis & Data Mining.
- Web Architecture & Development Framework.

That's mean there are very good opportunity for both Cloud & Distributed Computing and Business Analytics in the near Future.

Are you Ready !

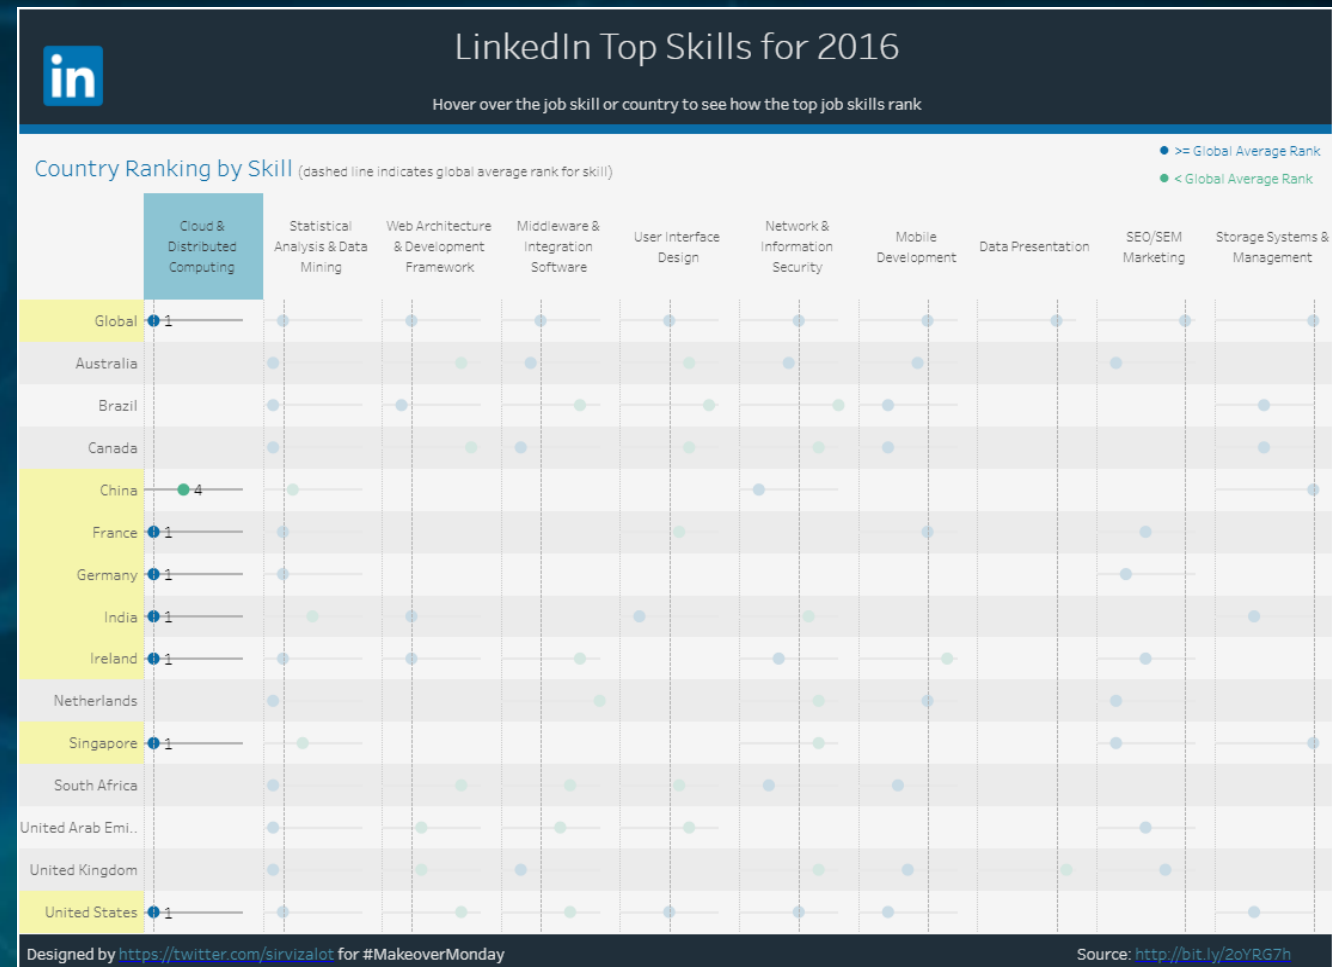

Top Countries are Ready, What about You ?

I select Cloud & Distributed Computing column to highlight the Top countries that already mastering the skill globally and they are:

France, Germany, India, Ireland, Singapore and United States.

This indicates that if you master this skill you can find a great opportunity at these countries if you choose to travel or working from home.

Time to Enroll in BAND Program...

I select Statistics Analysis & Data Mining to highlight how much important this skill is Today and in the Future.

I realized that, Statistics Analysis including Business Analytics are required and most wanted skill Today worldwide in the study. As you can see it's Ranked #1 in almost countries.

You can also join us Now by enrolling in Business Analytics Nano Degree program and master the skill as well.
